

Mesin Penimbang Benih Padi Semi Otomatis *Semi Automatic Balance for Rice Seed*

Balai Besar Pengembangan Mekanisasi Pertanian
Indonesian Center for Agricultural Engineering Research and Development

Mesin penimbang benih padi semi otomatis berfungsi untuk mengisi kantong kemasan benih padi dan sekaligus menimbang bobot benih dalam kemasan, ukuran kemasan benih 5 kg dengan waktu penimbangan lebih singkat dan tingkat presisi hasil timbangan lebih tinggi.

Spesifikasi mesin:

- Tipe : Timbangan semi otomatis
- Dimensi : (700 x 450 x 1.800) mm
- Kapasitas : 80-100 kemasan/jam
(tergantung operator)
- Tingkat akurasi penimbangan : 92-98 %
- Penggerak : Motor listrik 1 HP

The semi automatic balance for rice seeds serves to weight a package of rice seed. The weight of a package of rice seeds is 5 kg. The weighting time is short and the precision of scale is high.

Engine specifications

- (1) Type : Semi Automatic Scale
- (2) Dimensions : (700 x 450 x 1,800) mm
- (3) Capacity : 80-100 packs / hour
(depend on the operator)
- (4) The accuracy of the weighing : 92-98%
- (5) Power : Electric motor of 1 HP
