Sambutan Sekretaris Jenderal Kementerian Pertanian

Kinerja pembangunan pertanian periode 2010 – 2014 telah dicapai, oleh karena itu seyogyanya harus dapat ditingkatkan lebih tinggi lagi pada periode 2015 – 2019. Pada periode 2015 – 2019, sektor pertanian masih menjadi sektor penting dalam mendukung pembangunan ekonomi nasional. Agenda prioritas Kabinet Kerja “NAWACITA” mengarahkan pembangunan pertanian ke depan untuk mewujudkan kedaulatan pangan, di antaranya: (1) mencukupi kebutuhan pangan dari produksi dalam negeri, (2) mengatur kebijakan pangan secara mandiri, serta (3) melindungi dan menyejahterakan petani sebagai pelaku utama usaha pertanian pangan. Upaya mencapai target utama pembangunan pertanian di atas tidaklah mudah, karena dihadapkan pada kondisi permasalahan dan tantangan pembangunan pertanian yang tidak ringan. Untuk menghadapi kondisi tersebut, Kementerian Pertanian menerapkan strategi untuk memposisikan kembali pertanian sebagai motor penggerak pembangunan nasional meliputi (1) pencapaian swasembada padi, jagung, kedelai, cabai dan bawang merah serta peningkatan produksi gula dan daging, (2) peningkatan diversifikasi pangan, (3) peningkatan komoditas bernilai tambah dan berdaya saing dalam memenuhi pasar ekspor dan substitusi impor, (4) penyediaan bahan baku bioindustri dan bioenergi, (5) peningkatan pendapatan keluarga petani, serta (6) akuntabilitas kinerja aparatur pemerintah yang baik. Dengan sasaran strategis tersebut, maka Kementerian Pertanian menyusun dan melaksanakan 7 Strategi Utama Penguatan Pembangunan Pertanian untuk Kedaulatan Pangan (P3KP) meliputi (1) peningkatan ketersediaan dan pemanfaatan lahan, (2) peningkatan infrastruktur dan sarana pertanian, (3) pengembangan dan perluasan logistik benih/bibit, (4) penguatan kelembagaan petani, (5) pengembangan dan penguatan pembiayaan, (6) pengembangan dan penguatan bioindustri dan bioenergi, serta (7) penguatan jaringan pasar produk pertanian.

Berkaitan dengan hal tersebut, diperlukan penyediaan data dan informasi pertanian yang akurat dan *up to date*. Pusat Data dan Sistem Informasi Pertanian bekerjasama dengan unit kerja lainnya lingkup Kementerian Pertanian maupun unit kerja di luar Kementerian Pertanian telah melaksanakan pengumpulan, pengolahan dan penyajian data dan informasi pertanian yang hasilnya dikemas dalam bentuk bahan cetak berupa buku Statistik Pertanian 2017. Untuk kerjasama yang baik dalam usaha penerbitan buku ini, saya menyampaikan penghargaan yang tinggi. Buku Statistik Pertanian 2017 ini diharapkan dapat dimanfaatkan sebagai bahan referensi dalam menyusun dan memformulasikan program pembangunan pertanian. Bagi masyarakat luas dapat dimanfaatkan guna memantau perkembangan pembangunan pertanian di tingkat pusat maupun daerah.

Saya berharap masukan dan saran agar upaya baik yang telah dikerjakan oleh Pusat Data dan Sistem Informasi Pertanian ini dapat dipertahankan dan ditingkatkan kualitasnya untuk masa yang akan datang.

FOREWORD

The Secretary General of the Ministry of Agriculture

The performance of agricultural development during the 2010 – 2014 has been reached. This performance should be able to be improved preferably in the period 2015 to 2019. KATA PENGANTAR

Dukungan data yang akurat dan tepat waktu sangat diperlukan dalam mengambil kebijakan pada setiap tahap perencanaan pembangunan pertanian dalam berbagai periode. Sebagai kelanjutan dari publikasi tahun-tahun sebelumnya, pada tahun 2017 ini Pusat Data dan Sistem Informasi Pertanian (Pusdatin) Kementerian Pertanian menerbitkan Buku Statistik Pertanian 2017. Penerbitan buku tersebut dimaksudkan untuk mendukung terwujudnya pertanian tangguh yang ingin dicapai pada periode 2015 – 2019, melalui dukungan data yang terkait dengan produksi usaha tani, juga disajikan data sumber daya produksi dan pendukung lainnya dengan beberapa penyempurnaan dari penerbitan tahun-tahun sebelumnya.

Buku Statistik Pertanian 2017 menyajikan data series untuk 5 (lima) tahun terakhir yang terbagi dalam 4 (empat) bab mulai dari data sub sistem agribisnis hulu sampai dengan data sub sistem agribisnis hilir. Data dan informasi sub sistem agribisnis hulu meliputi data sumber daya alam, sumber daya modal dan sarana produksi. Adapun data sub sistem usaha tani meliputi data produksi dan populasi. Untuk sub sistem agribisnis hilir meliputi data produk domestik bruto, nilai tukar petani, perdagangan komoditas pertanian, harga dan konsumsi pertanian. Data sub sistem jasa penunjang meliputi sumber daya manusia, hasil teknologi pertanian dan kelembagaan pertanian. Data terakhir yang disajikan untuk Sub sektor Tanaman Pangan merupakan Angka Prakiraan Produksi 2017, Sub sektor Hortikultura Angka Tetap 2016, Sub sektor Perkebunan Angka Sementara 2016 dan Sub sektor Peternakan Angka Sementara 2017.

Buku ini tersusun berkat dukungan dan kerjasama yang baik dari berbagai pihak, yaitu Direktorat Jenderal dan Badan lingkup Kementerian Pertanian, Badan Pusat Statistik, Badan Koordinasi Penanaman Modal, Badan Meteorologi, Klimatologi dan Geofisika serta pihak lainnya yang terkait. Untuk itu pada kesempatan ini kami mengucapkan terima kasih atas dukungan dan kerjasamanya. Semoga apa yang tersaji dalam buku ini bermanfaat untuk memenuhi kebutuhan para pengguna data dan dapat dijadikan acuan dalam pengambilan kebijakan.

Kami akan sangat menghargai sumbang saran dan kritik yang sifatnya membangun, sebagai bahan masukan untuk penyempurnaan penerbitan tahun berikutnya.

PREFACE

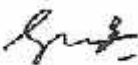

It has been realized that accurate and timely data is always required in every steps of agricultural development planning and activities. For this reason, as continuation of the publication as previous years, Centre for Agricultural Data and System Information (CADIS) Ministry of Agriculture publish The Agricultural Statistics 2017. In order to support the mission on establishing a strong agriculture sector in 2015 to 2019, beside the on-farm agricultural data, the publication also includes the production resources and other supporting data with some improvements on the contents.

Agriculture Statistics 2017 presents data in five year series from upstream to downstream agribusiness subsystem data. It is divided into four chapters with the following contents. Data on upstream agribusiness subsystem consists of natural resources, capital, and production facilities. The on farm subsystem data consists of production, agricultural consumption and population data. The downstream agribusiness subsystem data consist of processing, gross national product, and agricultural trades. Services and supporting subsystem data cover human resources, agricultural technology, and agriculture institutions. Data on farming subsystem for Food Crops are the estimation figure for the year 2017, Horticulture are fixed figure for the year 2016, Estate Crops are preliminary figure year 2016 and Livestock are preliminary figure year 2017.

It would have been impossible to compile this book without substantial support and contribution from many institutions within the Ministry of Agriculture, BPS - Statistics Indonesia, Investment Coordination Board, Indonesia Meteorological, Climatological and Geophysical Agency and other related institutions. We extend our gratitude and sincere thanks. Hopefully this publication will be useful for users as a reference for formulating a policy making. We are very grateful for constructive suggestions and critics. These would become inputs for us to improve the next publication.
